

2013 Foliar fungicide wheat trial data from Western MS. Treatments are grouped by active ingredient and presented as either strobilurin, triazole, or pre-mix applications. For all treatments, yield and test weight are presented from the trials conducted in the absence of disease.

Pioneer 26R22 (good stripe rust tolerance, moderate leaf rust tolerance)

Treatment	Yield (bu/A)	Test weight (lb/bu)
Nontreated	78.5	55.6
Strobilurin	76.3	55.8
Triazole	79.5	55.6
Pre-mix (strobilurin + triazole)	81.4	55.3

Pioneer 26R22 (good stripe rust tolerance, moderate leaf rust tolerance)

Treatment	Yield (bu/A)	Test weight (lb/bu)
Nontreated	81.3	57.3
Strobilurin	79.6	57.8
Pre-mix (strobilurin + triazole)	81.6	57.6

Georgia Gore (stripe and leaf rust susceptible)

Treatment	Yield (bu/A)	Test weight (lb/bu)
Nontreated	59.5	53.7
Strobilurin	60.2	53.4
Pre-mix (strobilurin + triazole)	58.1	53.6
