											LSD	.	.

RM = relative maturity

Seeds = # of seed/pound

D/I = determinate or indeterminate growth habit

Planting date (April 19, 2018) and harvest date (October 19, 2018) were used to determine the number of days soybean varieties were in the field as well as days beyond R8

Seed damage was evaluated using a 0-9 scale based on the percentage of grain within each damage category. A 0=no damage, 5=50% damage and a 7=70% damage.
