

# FIFRA Section 18 Emergency Exemption

Corteva Agriscience, LLC

9330 Zionsville Road

Indianapolis, IN 46268-1054

**Intrepid® 2F**  
EPA Reg. No. 62719-442

**For Control of Fall Armyworm on Rice**

**Section 18 Emergency Exemption**  
File symbol: 25MS01

**FOR DISTRIBUTION AND USE ONLY IN MISSISSIPPI UNDER FIFRA SECTION 18  
EMERGENCY EXEMPTION**

**This Section 18 Emergency Exemption is effective August 1, 2025, and expires September 30, 2025.**

## **ATTENTION**

- This labeling must be in the possession of the user at the time of application.
- It is in violation of Federal law to use this product in a manner inconsistent with its labeling.
- All application directions, restrictions, and precautions on the registered product label for Intrepid 2F (EPA Reg. No. 62719-442) are to be followed.
- Any adverse effects resulting from the use of Intrepid 2F under this emergency exemption must be immediately reported to the Mississippi Department of Agriculture.

**Keep Out of Reach of Children**

## **CAUTION**

### **Environmental Hazards**

Drift and runoff from applications of this product may be hazardous to sensitive aquatic invertebrates in water bodies adjacent to the treatment area. For terrestrial uses, do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

### **Groundwater Advisory**

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

### **Surface Water Advisory**

Methoxyfenozide can contaminate surface water through spray drift. Under some conditions, methoxyfenozide may also have a high potential for runoff into surface water (primarily via dissolution in runoff water) for several months post-application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas over-laying extremely shallow groundwater, areas with in-field canals or ditches that drain to overlaying tile drainage systems that drain to surface water.

Do not cultivate within 10 feet of aquatic areas to allow growth of a vegetative filter strip.

Do not apply by ground within 25 feet, or by air within 150 feet, of lakes, reservoirs, rivers, permanent streams, marshes, or natural ponds; estuaries and commercial fish farm ponds.
